Muğla, Türkiye

Computer Engineering graduate with IT and software internship experience. Currently working on ERP systems at Tersan Marine. Developing a Flutter-based psychology app for Teknofest. Skilled in Python, JavaScript, HTML, CSS, Flutter, and English.

Work Experience

ERP Support   Jun 2025 - Present

Tersan Marine | Muğla, Türkiye

At Tersan Marine, I manage ERP processes, provide system administration, data entry, and user support. I collaborate with different departments to ensure the effective use of ERP systems.

- ERP process management
- data analysis
- system support
- MS Excel
- user training

Computer Engineer Intern   Jun 2023 - Jul 2023

LENORA Bilişim Teknolojileri | Ankara, Türkiye

As a Software Intern at Lenora Information Technologies, I assisted in designing, coding, and testing websites. I worked with front-end technologies and gained experience in building responsive, user-friendly web interfaces in collaboration with the development team.

- HTML & CSS
- JavaScript
- Vue.js
- Git
- MySQL

- frontend

IT intern   Jul 2022 - Aug 2022

Yeniköy Kemerköy Elektrik Üretim ve Ticaret A.Ş. | Milas, Muğla, Türkiye

During my internship, I supported the IT team in maintaining and troubleshooting hardware and software systems. I assisted with user support, network monitoring, and inventory tracking. I gained hands-on experience in IT operations within a large-scale industrial environment.

- Python
- SQL
- Excel
- Hardware

Projects

psychological-mobile-application   Nov 2024 - Jul 2025

A Flutter-based mobile app that analyzes user input to detect emotions, track mood trends, and provide insights to support emotional awareness. Flutter – for cross-platform UI development Dart – as the main programming language Android Studio – for development and testing

Bank-App   Jul 2025 - Jul 2025

A simple React Native app to track savings and expenses, set financial goals, and monitor progress with visual insights. React Native JavaScript / TypeScript Expo or React Native CLI Firebase

MyWeb-Site   Jul 2025 - Present

A personal website (in progress) to showcase projects, skills, and contact info with a modern, responsive design. HTML5 / CSS3 / JavaScript

marine-field-app   Jun 2025 - Jul 2025

A React Native app for marine field teams, enabling task tracking, location reporting, and data collection to streamline field operations. React Native – cross-platform development JavaScript / TypeScript Redux – state management Expo or CLI
